Publicly Held Company

MATERIAL FACT

CENTRO DE IMAGEM DIAGNÓSTICOS S.A. ("Company") (B3: AALR3), informs its shareholders and the market in general that, following the plan to verticalize the clinical analysis service, the Company has started the internalization of pre-analytical services and entered into an agreement with **DB - MEDICINA DIAGNÓSTICA LTDA** ("DB") referring to the provision, by DB, for the benefit of the Company, of processing services for its clinical analysis tests ("Agreement"), in the context of its strategic planning and in line with its journey for operational efficiency and the increase in the scope of the provision of these services.

DB is the leader in the laboratory support segment in Brazil, with more than 40 regional support units, including three specialized units in the areas of molecular, pathological, and toxicological diagnosis.

Within the selection process carried out by the new management of Alliar, DB presented the most competitive proposal, and most aligned with Alliar's expansion plans so that the Company becomes one of the most relevant and recognized diagnostics companies in the country. The transition from the provision of such services to DB will be conducted in such a way that there is no discontinuity in the provision of laboratory testing services by the Company.

Alliar emphasizes that the Company maintains its intention announced in 2021 of building and operating its own Technical Operational Center and believes that the combination of this project with the processing capacity and experience of DB has enormous potential to generate value for its shareholders, partners, and customers.

São Paulo, July 5, 2022.
